plant-dyeing_mindful & zero waste

with Elke Fiebig

with Elke Fiebig (in German!)

The dyeing of natural fibers and thread is the focus of this course. Various mordants are necessary for proper plant-dyeing. Elke will show how amazingly many color-giving stuffs are available in our immediate surroundings, even in the kitchen. In addition she will teach how to use purchased color pigments. Not only practical knowledge is passed on to course participants, but also theory as regards fiber properties and basic plant dyeing. Beginners are most welcome.
